

## What you should know about .....

### The Early Recognition, Coordination and Screening Initiative

The **Early Recognition, Coordination and Screening Initiative** cultivates *cooperative relationships* with local primary care practices, schools and other community-based programs, to promote early identification through social emotional developmental screening and linkages to services.

Thirty-seven providers throughout NYS receive funds from the NYS Office of Mental Health to support a full time early recognition specialist.

This initiative also includes an important component on implementing stigma reduction and social marketing activities in schools and throughout the community.

### What does the Early Recognition, Coordination and Screening Initiative offer?

- ◇ Screening: with parental consent, a free and confidential social and emotional screening to check that children are on the right track for healthy development. Screenings may take place in a school, health center or other locations in the community
- ◇ After the screening responses are evaluated, families of children who are identified as needing support are given referral information to agencies that can provide further assessment and treatment
- ◇ Educational presentations and programming to promote social emotional wellness and combat stigma

*"Children and families are suffering because of missed opportunities for prevention and early identification, fragmented services, and low priorities for resources. Overriding these problems is the issue of stigma, which continues to surround mental illness."*

Report of the Surgeon General's Conference on  
Children's Mental Health A National Agenda (2000).
