

Everyday, the youth in New York State are expected to make choices that affect their health and well-being now and in the future. The disciplines of Health Education, Physical Education and Family & Consumer Sciences provide a natural foundation for the state standards. Each makes a significant contribution to the education and development of the whole child. Together they embrace a broad range of related skills, concepts and attitudes that prepare students to make these decisions.

Some suggestions to support lifelong wellness within your family:

- Model good nutrition and eating habits
- Encourage an active lifestyle
- Teach children to solve problems without violence
- Eat meals together
- Talk with and listen to your children
- Teach your children to budget their money
- Keep open lines of communication in regards to sex, drugs and social media
- Turn off electronics and go for a walk
- Monitor your child's online activity
- Volunteer in the community
- Be knowledgeable about and support your children's school and social activities
- Model and foster responsible and respectful behavior
- Challenge you children to always do their best
